## About the Program

Renko Charts are regarded as the most profitable and distinctive chart pattern but it is the most complicated chart because it ignores time and focuses solely on price movement which can make them more effective at identifying trends and patterns in the market.

This masterclass offers you hands-on experience through live interactive sessions and live trading sessions. Renko Charts is a complex topic to discuss but here, we have endeavoured to simplify it as much as possible.

This program will help you to understand market trends and how to identify where the trend begins and ends. You will revisit many classical market theories such as Dow Theory and Darvas Box, that are used to trade Renko Charts.

# Key Highlights

## 2 hours on-demand content

Here you will get recorded content for continuous learning that provides you with the fundamentals of Renko Charts

Connect with WhatsApp for the community support that will be available throughout this program

## Q&A Session with Experts

There has a doubt-clearing session to clarify all your doubts and address your queries by our mentor.

## Meet your Mentor

**Name:** Mr. Kaushik Akiwatkar

**Designation:** Derivative Trader and Investor

**Experience:** 7+ years

Kaushik Akiwatkar is a Derivative Trader and an Investor. He has over seven years of experience in trading and investing in the capital market. He has developed a unique way of identifying the trend of the Index and Stocks using a noiseless chart - Renko. He has observed on many occasions how Renko Charts can save you from a non-trending period and help you to identify the perfect entry before the start of the trend. He conducts workshops and boot camps based on his observations which have witnessed enthusiastic participation from people all over the world.

Learn various  
Trading Strategies  
in all Market Segments

Process to  
develop a  
Trading Plan

# Certification

After completion of the course, you will get your Elearnmarkets certification to enhance your career prospects!

## Testimonials

This was my first introduction to Renko charts. Looks to be a good beginning video for Renko. As a beginner I found this webinar very informative and interesting. Lot of knowledge and experience has been shared within a span of 3 hours. Will have to watch the video multiple times to grasp all the information. It will be helpful if some more webinars are arranged on the specific strategies of strangle, straddles and other non-directional strategies using Renko charts. Also it will be helpful if there is some back testing platform for Renko charts Normal charting platform like Trading view, investing.com, Zerodha (Kite) do not have the required charting options for the Renko so will have to use Trade Point (link give below) to use Renko charts as taught in this webinar.

Manoj Batra

Very informative webinar, gave new perspective for trading.

Jai Praveen

Information only on daily time frame, and speaker only talking of indicators - momentum.
